

Wallpaper, wallcoverings: "fine art giclee" for larger exposure.

[FREE REPORT](#)

Imaging trying to find a truck big enough to move a framed panoramic mural! Chances are the mural would be scratched during shipment. Now you can print on scores of papers and materials, and send a simple roll to the hotel, corporation, or home, and have the mural installed directly onto the already-existing wall.

FLAAR has been visiting ink companies that make special ink for printing wallpaper. So our report on Hongsam wallpaper, wallcovering ink will be issued before FESPA. We will do updates during FESPA and during APPPEXPO Shanghai.

Our report on wallcovering material from [DECAL](#) is now already available as a download. We visited their factory last month.

Many people have told us they notice that FLAAR Reports are covering much more than just printers: we evaluate inks, media, [substrates](#) , and [cutters](#).
